Summary

Full-stack **Growth Engineer** with end-to-end ownership: experimentation, analytics, product spec, and **React/Next.js** implementation through deployment and production. Shipped Porsche's first **AI-powered** marketing feature, ran A/B tests and content personalization at scale, and co-founded a referral platform startup. Uses **AI tools daily** (Cursor, Claude) to speed up engineering and product work.

Experience

Porsche Digital

Feb 2024 – Present

Senior Product Engineer

Barcelona, Spain

- Own the full growth-engineering pipeline for a core porsche.com workstream: discovery, experimentation, product spec, architecture, implementation, release, and production. Partner directly with product, marketing, and market stakeholders.
- Invented and built Porsche's first AI marketing feature end-to-end: an **AI-powered model finder** (natural-language search) live in production on porsche.com/uk, increasing engagement by **200%+** vs. the legacy search experience.
- Ran **A/B tests** across components, campaigns, and page structures using **Google Tag Manager** and **Google Analytics**. Built **content personalization** with **Salesforce** and **Astro Islands** to serve tailored experiences per market.
- Led the front-end architecture migration of porsche.com, delivering a modern stack using **AstroJS** and **VueJS/TypeScript**, improving page load performance and SEO signals by up to **40%** across global regions.
- Architected and maintained **CI/CD pipelines** using **AWS** and **GitLab CI**, enabling daily production deployments across **85+ markets**.
- Integrated **Storyblok CMS** with **NodeJS** services, enabling real-time content delivery and reducing content publishing time by **70%** for experiences serving **millions of users monthly**.

Viaplay

May 2023 – Feb 2024

Full Stack Engineer

Barcelona, Spain

- Owned checkout and payments end-to-end (Viaplay's core **conversion flow**) using **React**, **TypeScript**, **Next.js**, and **NX monorepo**, speeding up feature delivery by **30%**.
- Introduced the first automated **E2E and smoke testing** suite using **Cypress**, increasing release confidence and reducing hotfixes by **50%**.
- Developed backend services and payment features using **PHP (Yii)**, improving checkout reliability and reducing payment failures.
- Contributed to shared component architecture used across multiple product teams, improving UI consistency and reducing duplicated code.

Fever

Sep 2022 – May 2023

Engineering Manager

Barcelona, Spain

- Led and mentored a cross-functional engineering team, improving sprint predictability and delivery success rate by **35%**.
- Partnered with product leadership and stakeholders to shape roadmap priorities from business problems into shipped outcomes aligned with KPIs.
- Implemented data-driven performance tracking using engineering metrics and OKRs, reducing technical debt backlog.

SEAT:CODE

Jul 2020 – Sep 2022

Team Lead & Senior Frontend Engineer

Barcelona, Spain

- Led a team of **9 engineers** delivering large-scale digital automotive platforms using micro front-end architecture.
- Designed and scaled micro front-end architecture using **Angular**, **Nx Monorepo**, and **TDD**, improving platform scalability and reducing integration defects.
- Built enterprise CI pipelines using **GitHub Actions**, **SonarQube**, and automated testing suites, increasing code quality and reducing production incidents.

Credimarket

Jun 2019 – Sep 2020

Frontend Engineer

Barcelona, Spain

- Architected front-end platform for internal CRM using **Angular** and reactive programming, improving internal operational efficiency.
- Built reusable component libraries distributed via **Verdaccio**, accelerating internal product development.
- Implemented real-time features using **Socket.io** and state management using **Akita**, improving user interaction performance.

Worldline

May 2018 – Jun 2019

Frontend Engineer

Barcelona, Spain

- Delivered multiple client-facing projects, including fintech dashboards, healthcare chat platforms, and interactive web applications, working closely with customers from requirements to delivery.
- Implemented cross-browser compatibility and accessibility standards, improving product usability and compliance.

IndianWebs

Mar 2015 – Apr 2017

Web Developer

Barcelona, Spain

- Delivered full-stack web solutions for SMEs including e-commerce platforms using **PHP**, **JavaScript**, and **Prestashop**.
- Helped local businesses digitize operations and launch online sales channels from zero.

Skills

Frontend: React, Next.js, TypeScript, JavaScript, VueJS, AstroJS, Angular

Backend: Node.js, NestJS, PHP

Growth & Analytics: A/B Testing & Experimentation, SEO, Google Tag Manager, Google Analytics, Conversion Optimization, Content Personalization (Salesforce)

Infrastructure: AWS, CI/CD (GitLab CI, GitHub Actions), DynamoDB, Storyblok / Headless CMS

AI Tools: Cursor, Claude, ChatGPT, GitHub Copilot (used daily to speed up engineering and product work)

Education

Autonomous University of Barcelona

2015 – 2019

BSc Computer Science (Software Engineering)

Barcelona, Spain

Network Systems Administration (VET)

2013 – 2015

Institut Bernat el Ferrer

Barcelona, Spain

Microcomputer Networking Systems

2010 – 2012

Institut Bernat el Ferrer

Barcelona, Spain

Languages

English: C1

Spanish: Native

Catalan: Native

Extracurricular

Refy (Startup)

2020 – Present

Co-founder

Barcelona, Spain

- Co-founded and shipped a 0→1 SaaS **referral program** platform used by multiple paying companies, designing the referral logic and attribution flow from scratch.
- Owned product spec and full-stack architecture using **Next.js**, **NestJS**, and **DynamoDB**, plus cloud infrastructure and the full product delivery lifecycle.
- Product: refyapp.com

Viaplay Hackathon

2023

Hackathon Winner

Barcelona, Spain

- Built and deployed an AI-powered subtitle translation system using **AWS Lambda** enabling scalable multi-language content delivery.
